

Introduction to the Marine Turtle Monitoring Program and the Research Protocol*

Facilitator: Research Assistant

This activity serves as your preparation to participate in the marine turtle census. A research assistant will give you information about the marine turtle monitoring project and its components: such as the biometric data that is collected at the beach, equipment use, the nesting months, peaks of the nesting season and safety aspects among others. With this preparation, you will be ready to see the actual work on the beach.

Duration

45 minutes

Time

Determined on site

Capacity

15 pax

¿Where?

Beach, in front of the station.

Cost

Included in your rate.

Packing list

No special equipment required.

* This training in the research protocol is a requisite to participation in the marine turtle census.
